

BOARD PROFILE

**Jamie Cohen**

INDEPENDENT NON-EXECUTIVE DIRECTOR  
BOARD ADVISER

Clear judgement  
for consequential  
decisions.

# Technology is now a board-level issue.

Artificial Intelligence, cyber security, digital transformation and technology investment increasingly shape enterprise value, competitive advantage and organisational risk.

I work with boards, founders and executive teams to bring independent judgement to these decisions. Drawing on more than twenty-five years of executive leadership, I help organisations challenge assumptions, assess risk, prioritise investment and make technology decisions that create sustainable long-term value.

Alongside my Board appointments, I currently serve as Executive Architect within a global technology business, advising senior leadership on enterprise architecture, AI governance and strategic technology investment across a business unit generating approximately US\$1 billion in annual revenue.

*Independent judgement for boards, founders and executive teams making consequential decisions about technology, growth and risk.*

# Perspective earned at operating depth.

## 3

### Board appointments
